WHY MILLIONAIRES DO NOT PLAY POWERBALL

This is a simple powerball simulater representing ONE single game of powerball where many quick pick tickets were bought. (http://www.powerball.com/pb_home.asp).

Grand Prize

60000000

Winning Ticket

[1] 5 41 55 59 67 8

The last number represents the powerball. First 5 numbers are white balls ordered from least to greatest.

Tickets Bought

10000

Winning Tickets

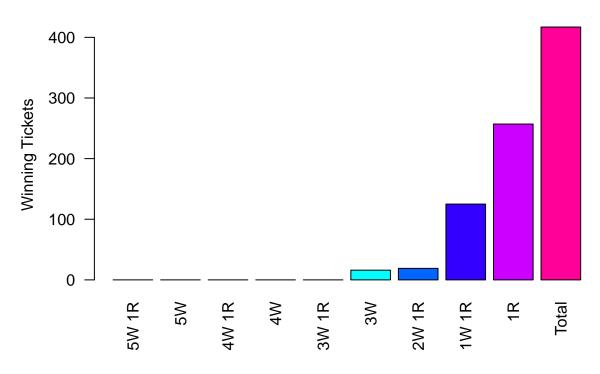

For a list of all winning tickets go to appendix below.

Best Ticket

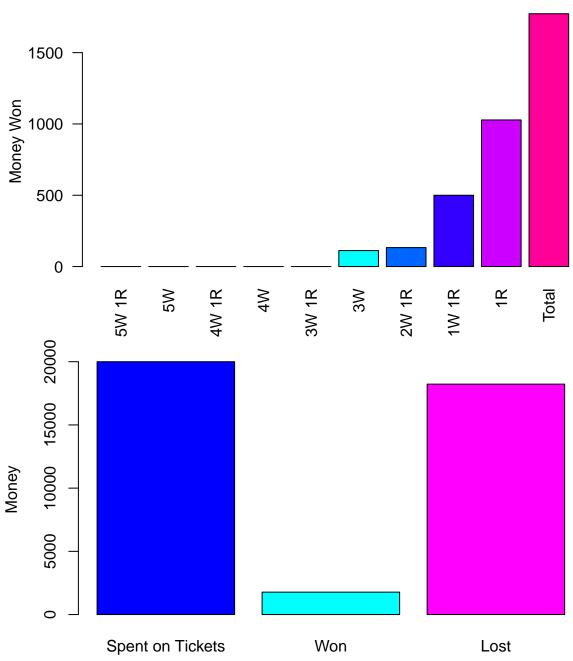

22 33 38 55 67 8

2 Whites + Powerball Matched (\$7)NULL

Winning Tickets

Ticket Winnings

Summary

```
You spent $20000 and won $1773
    417 out of 10000 tickets were winners.
##
    You lost $ 18227 (if negative you won!!).
##
    You got 5 White + Powerball
                                       0 \text{ time(s)}.
##
##
    You got 5 White
                                       0 \text{ time(s)}.
   You got 4 White + Powerball
##
                                       0 \text{ time(s)}.
   You got 4 White
                                       0 time(s),
    You got 3 White + Powerball
                                       0 \text{ time(s)}.
```
